Welcome from the organisers

An increasing number of biological disciplines focus on fish skeletal biology, including paleontology, morphology, developmental biology, systematic, genomics, proteomics, regenerative medicine, and aquaculture. The first International Workshop on "Interdisciplinary Approaches in Fish Skeletal Biology" aims at joining experts from these, often separated, research communities and promote exchange in ideas, concepts and methodological approaches applied to fish skeletal research. This should contribute to the advancement of research in all sub-disciplines and implement the basis for new interdisciplinary collaborations in this field. We heartily welcome all participants and we thank everybody for contributing to make this workshop a reality.

We hope that you will all have an exciting, fruitful and joyful meeting.

17:30	Oral session 3 BASIC PROCESSES THAT SHAPE THE TELEOST SKELETON	Oral session 7 ANALYTICAL VISUALISATION OF SKELETAL DEVELOPMENT	Plenary discussion 16.00 - 19.00
20:00	Dinner	Dinner	Barbecue

Detailed programme

DAY 1: MONDAY APRIL 27

09.20 WELCOME BY THE ORGANISERS

OPENING LECTURE

Chair: Wilga CD

09.30 Charles Darwin, embryology, evolution and skeletal plasticity
Hall BK

10.40 Coffee break

ORAL SESSION 1. EVOLUTION OF TEETH AND DERMAL SKELETAL ELEMENTS

Chair: Yelick P

- 11.00 Evolution of development for patterning fish dentitions
Smith MM
- 11.25 A revised hypothesis on the evolutionary origin of the vertebrate dentition
Huysseune A, Sire J-Y, Witten PE
- 11.50 Variability of the pharyngeal dentition in *Barbus intermedius* (Teleostei; Cyprinidae): Genetic, hormonal and environmental factors
Shkil FN, Levin BA, Abdissa B, Smirnov SV
- 12.15 *Actinodin*, a new fish-specific gene family essential for actinotrichia formation
Zhang J, Wagh P., Sanchez-Pulido L, Padhi BK, Andrade-Navarro MA, Akimenko M-A

12.40 Lunch break

ORAL SESSION 2. THE FISH SKELETON: A BIOMEDICAL PERSPECTIVE

Chair: Sire J-Y

- 14.00 Fish as model organisms to uncover new Gla proteins of interest for human biology
Cancela ML, Viegas CSB, Laizé V, Simes DC
- 14.25 Craniofacial and tooth development and regeneration
Connolly M, Albertson RC, Lee Y, Fraher D, Stewart-Swift C, Huysseune A, Yelick PC
- 14.50 Genetic screens to identify gene functions essential for bone formation
Huitema L, Schulte-Merker S
- 15.15 Biomedical research using Bone Morphogenetic Proteins: from fish to man
Mallein-Gerin F

15.40 Coffee break and posters

POSTER SESSION 1.

ORAL SESSION 3. BASIC PROCESSES THAT SHAPE THE TELEOST SKELETON

Chair: Schulte-Merker S

- 17.30 The unobtrusive majority: Mononucleated bone resorbing cells in fish and mammals
Witten PE, Huysseune A
- 17.55 Is cartilage required to regenerate dermal bone in the zebrafish caudal fin?
Afonso N, Fonseca M, Sousa S, Jacinto A
- 18.20 Hyoid and pharyngeal arch function during ventilation and feeding in elasmobranchs
Wilga CD
- 18.45 Dealing with stress: opercular bones in suction feeding fishes
Adriaens D, Leysen L, Dierick M, Roos G, Christiaens J, Van Wassenbergh S, De Clerck N, Van Hoorebeke L

20.00 Dinner

Day 2. Tuesday April 28

ORAL SESSION 4. PHENOTYPIC PLASTICITY I

Chair: Palmeirim I

- 09.00 **Epigenetic effects on musculoskeletal development**
Kranenborg S, van der Meulen T, van Turhout MC, van Leeuwen JL
- 09.25 **The effect of increased mechanical forces on the development and evolution of intramuscular bones in fish**
Danos N
- 09.50 **Drastic shift in the number of lateral line scales in cyprinid fishes as a result of heterochronies: experimental data**
Levin BA, Smirnov SV
- 10.15 **Bipartite life cycle of coral reef fishes promotes increasing shape disparity of the head skeleton during ontogeny**
Frédéric B, Vandewalle P

10.40 Coffee break

ORAL SESSION 5. SHAPING THE SKELETON WITH NUTRITIONAL FACTORS

Chair: Rosenthal H

- 11.00 **Role of dietary phosphorus, vitamin C, vitamin A and lipid peroxidation in the pathogenesis of skeletal abnormalities in Atlantic halibut (*Hippoglossus hippoglossus*)**
Lall SP, Lewis LM
- 11.25 **Bone tissue originated from endochondral ossification is more sensitive than intramembranous bone to vitamin A dietary unbalances in Senegal sole early juveniles**
Fernández I, Gisbert E
- 11.50 **Skeletal evaluation and technical improvements to decrease the incidence of skeletal deformities in *Solea senegalensis*, Kaup**
Gavaia PJ, Richard N, Dámaso L, Dinis MT, Pousão-Ferreira P, Engrola S, Conceição L, Cancela ML
- 12.15 **Studies on the appearance of skeleton anomalies in red gorgy: effect of culture intensiveness, feeding habits and nutritional quality of live preys**
Izquierdo MS, Roo J, Socorro J, Fernandez-Palacios H

12.40 Lunch break

ORAL SESSION 6. PHENOTYPIC PLASTICITY II: SKELETAL RESPONSES TO DEFINED ENVIRONMENTS

Chair: Boglione C

- 14.00 **Skeletogenesis and bone mineralization in developing sea bass (*Dicentrarchus labrax*) larvae**
Darias MJ, Lan Chow O, Mazurais D, Cahu C, Zambonino-Infante JL
- 14.25 **Skeletal anomalies and fluctuating asymmetry in farmed rainbow trout (*Oncorhynchus mykiss*, Walbaum 1792)**
Pulcini D, Boglione C, Palamara E, Cataudella S
- 14.50 **Effect of hatchery environment on cranial morphology and developmental stability in Atlantic salmon (*Salmo salar* L.) from North-West Russia**
Yurtseva A, Lajus D, Artamonova V, Makhrov A
- 15.15 **Effect of rearing technique over skeletal deformities incidence and osteological development in red gorgy *Pagrus pagrus* (Linnaeus, 1758) larvae**
Roo FJ, Hernández-Cruz CM, Socorro JA, Fernández-Palacios H, Izquierdo MS

15.40 Coffee break and posters

POSTER SESSION 2.

ORAL SESSION 7. ANALYTICAL VISUALISATION OF SKELETAL DEVELOPMENT

Chair: Winkler C

- 17.30 **Micromorphology of the tessellated skeleton of cartilaginous fishes**
Dean MN, Claeson KM, Summers AP
- 17.55 **Synchrotron microcomputer tomography for the non-destructive visualization of the fish skeleton**
Epple M, Neues F

- 18.20 **Changes in vertebral structure during growth of reared rainbow trout, *Oncorhynchus mykiss* (Walbaum): a new approach using modeling of vertebral bone profiles**
Deschamps M-H, Girondot M, Labb   L, Sire J-Y
- 18.45 **Visualization of skeletal deformity in live marine fish larvae by fluorescent calcein staining**
Haga Y, Masui S, Fujinami Y, Aritaki M, Satoh S

20.00 **Dinner**

Day 3. Wednesday April 29

ORAL SESSION 8. UNRAVELLING THE CAUSES OF SKELETAL PATHOLOGIES

Chair: Izquierdo MS

- 09.00 **Dietary fatty acids and inflammation in the vertebral column of Atlantic salmon (*Salmo salar*) smolts: A possible link to spinal deformities**
Gil-Martens L, Lock EJ, Fjelldal PG, Wargelius A, Araujo P, Torstensen BE, Witten PE, Hansen T, Waagb   R,   rnsrud R
- 09.25 **Modeling the relationship between rearing methodology and morphological quality in farmed gilthead seabream (*Sparus aurata*, L. 1758): an application of self organizing map to the study of anomalies in shape and number of skeletal elements in gilthead seabream juveniles**
Prestinicola L, Russo T, Palamara E, Cataudella S, Boglione C
- 09.50 **MMP-13 (matrix metalloproteinase 13) may be a potential indicator of chronic inflammation in compressed vertebrae of Atlantic salmon (*Salmo salar* L)**
Wargelius A, Fjelldal PG, Grini A, Gil-Martens L, Kvamme B-O, Hansen T
- 10.15 **The effect of vertebral deformities on growth in Atlantic salmon (*Salmo salar* L.)**
Hansen T, Fjelldal PG, Yurtseva A, Berg A

10.40 **Coffee break**

ORAL SESSION 9. THE GENETIC AND DEVELOPMENTAL BASIS OF SKELETOGENESIS I

Chair: Smith M

- 11.00 **Monitoring BMP signaling during skeletal development in zebrafish**
Schilling T, Alexander C
- 11.25 **Sparc (osteoneectin) functions in morphogenesis of pharyngeal skeleton and inner ear**
Rotllant J, Liu D, Yan Y-L, Postlethwait JH, Westerfield M, Du S-J
- 11.50 **Osterix regulates bone formation in medaka**
Renn J, Winkler C
- 12.15 **Function and regulation of *dlx* genes in the pharyngeal arches of zebrafish**
Ekker M, Sperber S, MacDonald R, Saxena V

12.40 **Lunch break**

ORAL SESSION 10. THE GENETIC AND DEVELOPMENTAL BASIS OF SKELETOGENESIS II

Chair: Akimenko MA

- 14.00 **The function of the Egr1 transcription factor in cartilage formation and adaptation to microgravity in *Danio rerio***
Muller M, Dalcq J, Pasque V, Aceto J, Motte P, Martial JA
- 14.25 **The zebrafish as a model to study the genes underlying postembryonic development of the skeleton**
Harris M, Rohner N, Nuesslein-Volhard C

15.40 **Coffee break**

PLENARY DISCUSSION

Chairs: Cancela ML & Witten PE

- 16.00 **Future Interdisciplinary Approaches in Fish Skeletal Biology**
- 20.00 **Barbecue – Conference party**
